Manage your Company's Usage of NAV Access

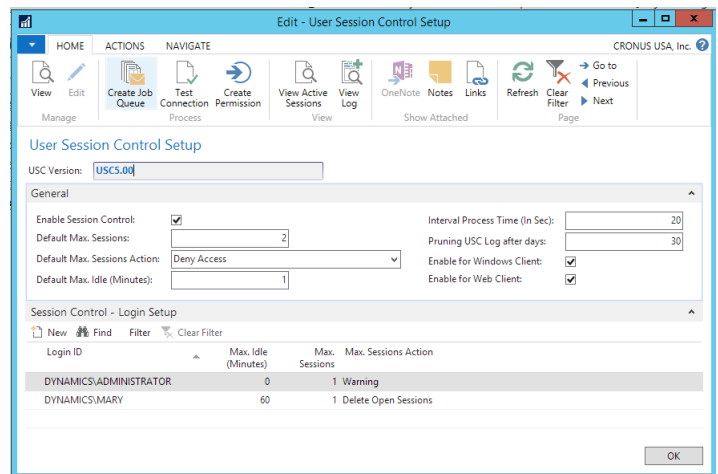

- ✓ Automatically disconnect sessions that have been idle for more than a specified amount of time.
- ✓ Limit the number of time users may log into NAV.
- ✓ Control what happens if users try to log in more times than allowed

Set a Global and User Specific parameters.

Set a global amount of idle time for all users. If desired, individual users may have specific idle time entries that are different. Entering 0 in the user-specific Idle Time will cause the user to never be disconnected.

Use NAS or Web Services to track Idle Time.

Control the number of session a user may open and what happens if they try to open additional session.

- ✓ Set Global limits as well as user-specific limits. Entering 0 allows unlimited sessions.
- ✓ When users attempt to open additional sessions, the software may:
 - Warn that a session is already open and allow the user to open an additional session
 - Deny the attempt to open an additional session with a dialog explaining what has happened.
 - Allow the new session to be open and automatically close the old session.
